

## ***CIM EG Maintenance Request form***

This form is to be addressed to the CIM EG Convenor at [cim@entsoe.eu](mailto:cim@entsoe.eu)

<b>Date of submission:</b>	25/09/2024
<b>Submittor Name:</b>	Jan Owe
<b>Organisation:</b>	Svenska kraftnät
<b>E-mail :</b>	jan.owe@svk.se

<b>Maintenance Request title:</b>	<p><b>Permission end purpose ReasonType</b></p> <p><b>Axx:</b> Customer move-out  <b>Axx:</b> No valid Grid access contract</p> <p><b>Permission purpose (Reason codes):</b>  <b>AXX:</b> (Explicit) Permission from the customer</p>
<b>Impacted document/schema:</b>	Permission MarketDocument, compare the Implementation Guide (Procedures for access to metering & consumption data)
<b>Clause/Paragraph/Figure/Table:</b>	See below under description

### Description of issue:

Four codes for Permission end purpose and five codes for permission purpose were discussed and agreed upon within ENTSO-E, earlier this year.

But when implementing the EU implementing regulation 2023/1162 on *interoperability requirements and non-discriminatory and transparent procedures for access to metering and consumption data* there could be other reasons to end a permission than *Fulfilment of purpose, Reach of Permission end timestamp, Revocation of Final Customer* and *Termination by the Eligible Party*. Additionally, there can also be more reasons to grant a permission to access data.

The Permission administrator will typically be informed that a Final customer has moved out from a specific Accounting point.

The Permission administrator may also be informed that a Final customer no longer has a valid grid access contract at a specific Accounting point (but has not moved out).

Both of these cases could be valid reasons for ending a permission, and then sending this information to the Eligible party.

There are ebIX® reason codes, E37 = “No valid grid access contract” and E66 = “Consumer move-out” that would correspond to the request in this MR and could be discussed as possible existing codes to use.

### Proposed resolution:

The suggestion is to add new reason types

### ENTSO-E Code List change request

Type of code	Code <sup>(1)</sup> :	Definition:	Description:
<i>ReasonType</i>	Axx	No valid grid access contract	There is no valid grid access contract for a specific metering point.
<i>ReasonType</i>	Axx	Customer move-out	A customer has moved out.
<i>ReasonType</i>	Axx	(Explicit) Permission from the customer	Based on the regulation (EU) 2016/679 (GDPR) Article 6, Lawfulness of processing: The data subject has given consent to the processing of his or her personal data for one or more specific purposes.

<sup>1</sup> The “Code” field is to be completed in the case of modifications to existing codes.

All participants in the European Electricity Market/System Operation/System Development may issue a Maintenance Request concerning ENTSO-E documentation or guides. This document defines the form that is to be used to submit such a request.

General guidelines for the Maintenance Request submission:

- The form is to be completed with all the necessary information.
- All associated documents required for the understanding of the Maintenance Request are to be provided.
- It is highly recommended to provide a presentation describing the business process and why a change to an existing process is necessary. If needed the requester can be invited to present their Maintenance Request to CIM EG. Failing that a CIM EG Member should champion the Maintenance Request so that any questions raised may be immediately resolved.

The CIM EG Convener will inform the submitter when the Maintenance Request is to be reviewed by the CIM EG.

The Maintenance Request shall be provided to CIM EG Members and Corresponding Members prior to its presentation for approval.

The Maintenance Request will be debated within CIM EG and the CIM EG Members shall state:

- If the Maintenance Request is to be rejected.
- If the Maintenance Request is accepted.

All decisions shall be obtained through consensus<sup>2</sup>.

In all cases, the requester shall be informed of the CIM EG decision.

Accepted Maintenance Requests, before being implemented in the existing standards, shall be published on the ENTSO-E website.

### **Final Agreement:**

---

<sup>2</sup> ISO definition of Consensus: “general agreement, characterized by the absence of sustained opposition to substantial issues by any important part of the concerned interests and by a process that involves seeking to take into account the views of all parties concerned and to reconcile any conflicting arguments”.
