

CIM EG Maintenance Request form

This form is to be addressed to the CIM EG Convenor at cim@entsoe.eu

Date of submission:	24/04/2024
Submittor Name:	Wout van Voornveld
Organisation:	Project EDDIE
E-mail:	w.van.voornveld@gasunie.nl

Maintenance Request title:	Extension of the codelist of ESMP for support of the Permission proces		
Impacted document/schema:	Codelist		
Clause/Paragraph/Figure/Table:	See below under description		
<p>Description of issue:</p> <p>For project EDDIE (European Distributed Data Infrastructure for Energy) we are facilitating the exchange of metering and consumption data confirm the newly adopted implementing act (EU) 2023/1162. Part of that process involves the permission request handling. In this process several states are used which are currently missing from the existing StatusType codelist enumeration.</p>			
<p>Proposed resolution:</p> <p>Incorporating new permission specific status entries in StatusTypeList enumeration for the permission status attribute in the permission class.</p>			
<p>ENTSO-E Code List change request</p>			
Type of code	Code¹⁾:	Definition:	Description:
<i>statusType</i>	Axx	Validated	The object or request action was validated.
	Axx	Invalid	The object or request action was invalid.
	Axx	Timed out	The request action was timed out.
	A13	Withdrawn	The information or request action has been withdrawn by the submitter.

¹ The "Code" field is to be completed in the case of modifications to existing codes.

All participants in the European Electricity Market/System Operation/System Development may issue a Maintenance Request concerning ENTSO-E documentation or guides. This document defines the form that is to be used to submit such a request.

General guidelines for the Maintenance Request submission:

- The form is to be completed with all the necessary information.
- All associated documents required for the understanding of the Maintenance Request are to be provided.
- It is highly recommended to provide a presentation describing the business process and why a change to an existing process is necessary. If needed the requester can be invited to present their Maintenance Request to CIM EG. Failing that a CIM EG Member should champion the Maintenance Request so that any questions raised may be immediately resolved.

The CIM EG Convener will inform the submitter when the Maintenance Request is to be reviewed by the CIM EG.

The Maintenance Request shall be provided to CIM EG Members and Corresponding Members prior to its presentation for approval.

The Maintenance Request will be debated within CIM EG and the CIM EG Members shall state:

- If the Maintenance Request is to be rejected.
- If the Maintenance Request is accepted.

All decisions shall be obtained through consensus².

In all cases, the requester shall be informed of the CIM EG decision.

Accepted Maintenance Requests, before being implemented in the existing standards, shall be published on the ENTSO-E website.

Agreement:

Agreed by SG on 24 April 2024

² ISO definition of Consensus: “general agreement, characterized by the absence of sustained opposition to substantial issues by any important part of the concerned interests and by a process that involves seeking to take into account the views of all parties concerned and to reconcile any conflicting arguments”.
